

**BUILT FOR
MODERN
HOSPITALITY**

Smarter Operations. Higher Profits. Happier Guests.

01 | Natural Language AI Business Intelligence

Allows managers to ask plain-language questions ("What was our highest-margin side dish during peak hours this weekend?"). A dual-engine AI pipeline generates schema-aware SQL and executes verified queries against live operational data.

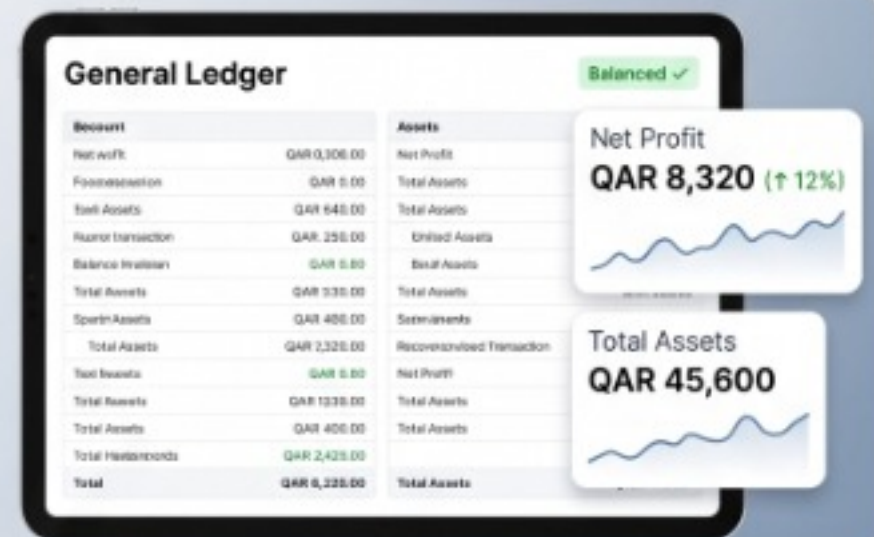

- Ask in Plain English
- Auto SQL Generation
- Verified Execution
- Live Insights & Reports

02 | Automated Double-Entry Accounting Engine

Every transaction—POS sales, split payments, inventory purchases, and payroll—automatically posts balanced debit/credit journal entries to the General Ledger, generating real-time P&L and Balance Sheet reports with zero manual end-of-day export overhead.

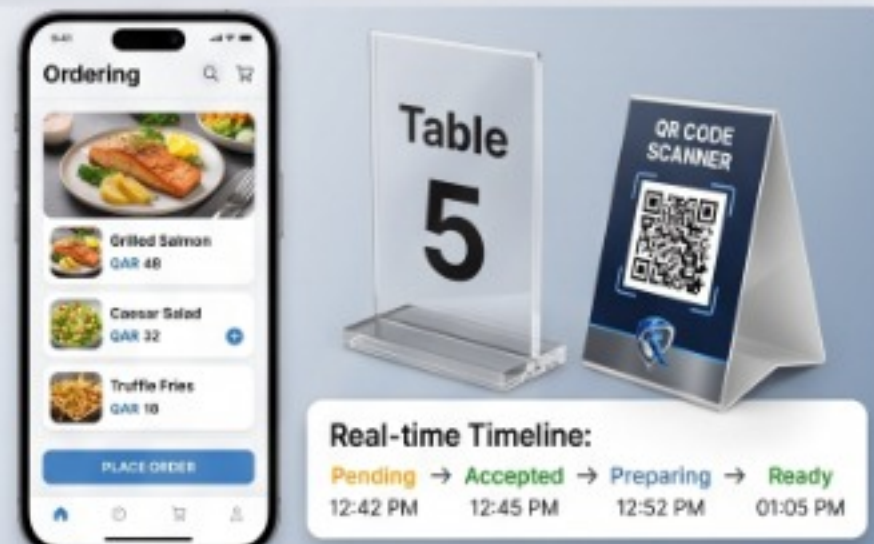

- Auto Journal Entries
- Real-Time P&L & Balance Sheet
- VAT & Tax Compliant
- Zero Manual Exports

03 | Full-Journey QR Table Self-Ordering

Guests scan table-specific QR codes on their mobile devices to browse menus, place orders, call waitstaff, and monitor preparation status (Pending → Accepted → Ready) via live WebSockets directly into the POS without staff intervention.

- Scan QR at Table
- Interactive Mobile Menu
- Call Waitstaff Button
- Live Status Tracker

Device Compatibility Tag: Compatible with: POS • Mobile • Tablet • iPad • Laptop • Desktop

MORE EFFICIENCY
Less Manual Work

BETTER DECISIONS
With Real-Time Data

HIGHER REVENUE
Through Smart Operations

Cloud | Secure | Scalable | Works on Any Device.

ENGINEERED
FOR
HIGH-VOLUME
VENUES

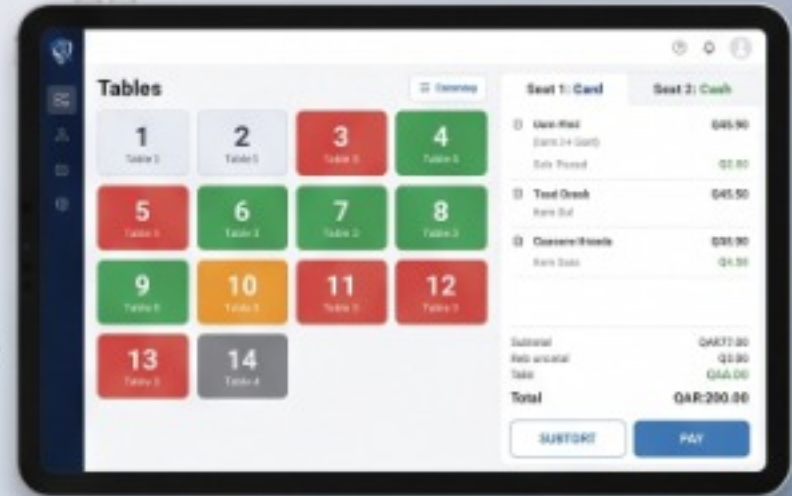

Smarter Operations. Higher Profits. Happier Guests.

unified operations & payments

04 | Real-Time POS & Multi-Workflow Ordering

Manage Dine-In, Takeaway, and Delivery from a unified screen with zero operational lag. Split bills effortlessly across multiple guests, process partial payments, and modify running tickets on the fly before kitchen prep starts.

- Multi-Workflow Ordering
- Split Check & Partial Pay
- Dynamic Order Edits
- Instant Table Status Sync

automated self-ordering

05 | Interactive Self-Service KIOSK Station

Eliminate counter queues and increase ticket sizes. Large-format touchscreens provide photo-rich menus, automated modifier and combo upsells, direct card payment handling, and automated queue token printing.

- Touchscreen Upsell Engine
- Line-Busting Flow
- Contactless Card Checkout
- Automated Token Printing

smart kitchen coordination

06 | Kitchen Display System (KDS) & Prep Pacing

Route tickets dynamically to specific cook stations (Grill, Fryer, Cold Line, Drinks) with automated cook-time pacing. Kitchen staff coordinate multi-course preparation with color-coded timers to eliminate bottlenecks and ticket clutter.

- Multi-Station Routing
- Cook-Time Pacing
- Color-Coded Timers
- Server Dispatch Alerts

Runs on: POS Terminals • Kiosk Displays • Tablets • iPads • Kitchen Monitors

COMPLETE
LOSS PREVENTION
& PAYMENT
AUTOMATION

Smarter Operations. Higher Profits. Happier Guests.

AUTOMATED RECIPE COSTING & DEPLETION

07 | Recipe-Level Inventory & Auto-Depletion

Link every dish and modifier directly to raw ingredient bills of materials (BOM). Stock levels deplete down to the gram as orders clear the kitchen, giving managers live inventory metrics and automated reorder alerts.

- Sub-Gram Recipe Costing
- Kitchen-Triggered Depletion
- Automated Low-Stock Alerts
- Spoilage & Wastage Logs

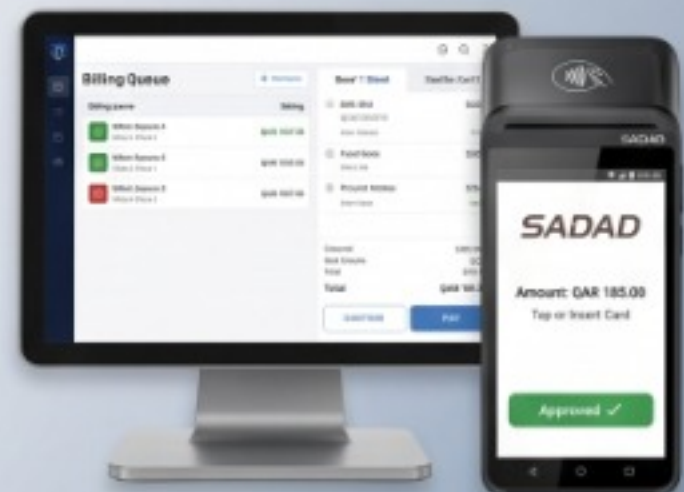

PAYMENT INTEGRATION & API

08 | Integrated SADAD POS Terminal & Split Payments

Bridge Qubexe POS directly with SADAD smart payment terminals via local network and cloud APIs. Bill amounts push straight to the terminal screen with zero manual re-keying, eliminating cashier input errors and reconciling settlements directly into the general ledger.

- Direct POS-to-Terminal Push
- Zero Manual Re-Entry Errors
- Consolidated Bill & Bank Slip
- Instant GL Bank Settlement

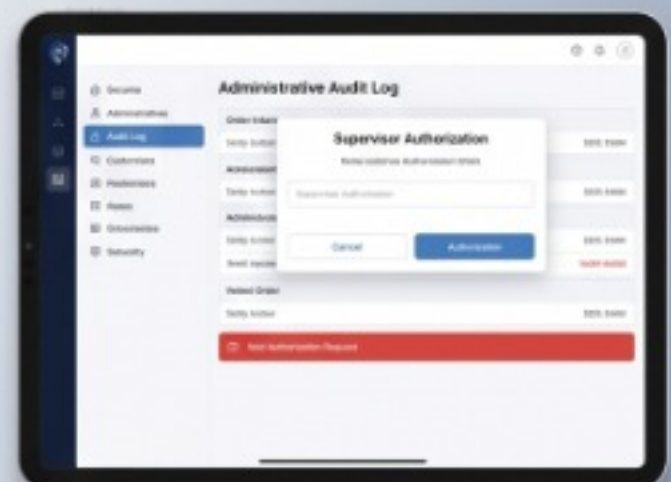

SECURITY & AUDIT TRAILS

09 | Complete Order Audit Trail & Ledger Recovery

Prevent operational fraud, theft, and unauthorized voids. Every order cancellation, reopen, or discount requires supervisor authorization, maintaining an immutable audit log that automatically posts compensating ledger reversals.

- Mandatory Reason Logging
- 1-Click Order Re-Opening
- Instant Ledger Reversals
- Searchable Void History

Synchronized Across: POS • SADAD Handhelds • Tablets • Laptops • Desktops

**MULTI-BRANCH
SCALABILITY &
NATIVE ARABIC
ARCHITECTURE**

Smarter Operations. Higher Profits. Happier Guests.

AUTOMATED TV MENU

10 | Dynamic TV Menu Display System

Run high-resolution digital menu boards that automatically sync with live POS inventory. When an item runs out, it instantly shows "Sold Out" or disappears across all screens. Includes offline playback caching and promotional carousels.

- Live Inventory Auto-Sync
- Instant Sold-Out Toggling
- 100% Offline Mode Cache
- Dynamic Video & Promo Banners

NATIVE ARABIC & E-INVOICING

11 | Native Arabic, RTL & GCC E-Invoicing

Built with 90+ localized UI strings and instant zero-reload language switching. Generates fully compliant Arabic/English Zakat & VAT QR receipts with native Right-to-Left formatting engineered specifically for Middle Eastern operations.

- Instant Arabic/English Toggle
- Tax Authority Compliant QR
- Native RTL Layout Engine
- Multi-Currency Formatting

MULTI-BRANCH MANAGEMENT

12 | Executive MIS & Multi-Branch Cloud HQ

Monitor multi-location performance from a single executive dashboard. Track hourly sales velocity, category margins, and customer accounts receivable while harmonizing menu pricing and central commissary stock across all branches.

- Hourly Sales Velocity
- Top Menu Performers
- Central Multi-Branch Control
- Multi-Period P&L Comparison

Device Compatibility Tag: Accessible – POS • Tablets • iPads • Laptops • Executive Desktops

MORE EFFICIENCY • **BETTER DECISIONS** • **HIGHER REVENUE** • **HAPPIER GUESTS**
Less Manual Work • With Real-Time Data • Through Smart Operations • Seamless Experience

RESTAURANTS, CAFES

A dedicated hospitality module built to optimize high-volume food and beverage operations.

TABLE & FLOOR MANAGEMENT

- Visual Floor Planning: Map accurate, custom dining room layouts.
- Real-Time Table Tracking: Monitor occupied, vacant, and reserved tables live.
- Dynamic Seating Control: Transfer guests or merge tables for large parties effortlessly.
- Guest Profiling: Track seat counts and attach customer profiles to orders.

KITCHEN & ORDER ROUTING

- Automated KOT Dispatch: Route tickets directly to designated kitchen and bar stations.
- Smart Prep Printing: Automatically direct menu items to specific prep areas (grill, bar, pantry).
- Order Lifecycle Monitoring: Track order progression from entry to final presentation.

SERVICE TYPES

- Dine-In Management: Support full course timing and split-check functionality.
- Express Takeaway: Streamline rapid checkout for counter pickup orders.
- Delivery Logistics: Assign drivers, track active routes, and generate fulfillment reports.

STAFF & WAITER OPERATIONS

- Section Allocation: Assign servers to dedicated tables or floor zones.
- Performance Audit Trails: Log individual server sales and transaction speed.
- Automated Service Fees: Apply standard service charges or customized gratuities instantly.

MADE FOR
TAILORS.
BUILT FOR
GROWTH.

THE BIG 5 BENEFITS

1 DIGITAL MEASUREMENT BOOK

Eliminates lost paper notebooks and misread handwriting with saved customer body profiles & garment styles.

2 LIVE ORDER STAGE TRACKING

Real-time status:
Cutting → Stitching → Trial Date
→ Delivery. No more missed
deadlines or customer follow-up calls.

3 FABRIC & STOCK MANAGEMENT

Track fabric rolls, meters, buttons,
zippers, and trims in real-time
with low-stock alerts.

4 TAILOR ASSIGNMENT & PAYROLL / HRM

Assign orders to specific masters/
tailors, track daily attendance,
piece-rate commissions, and
generate monthly payslips.

5 ALL-IN-ONE POS & ACCOUNTING

Integrated invoicing, advance
deposits, VAT compliance,
supplier bills, and automated
double-entry ledger.
